SLAMP:

PREFACE

limitless PROJECTS

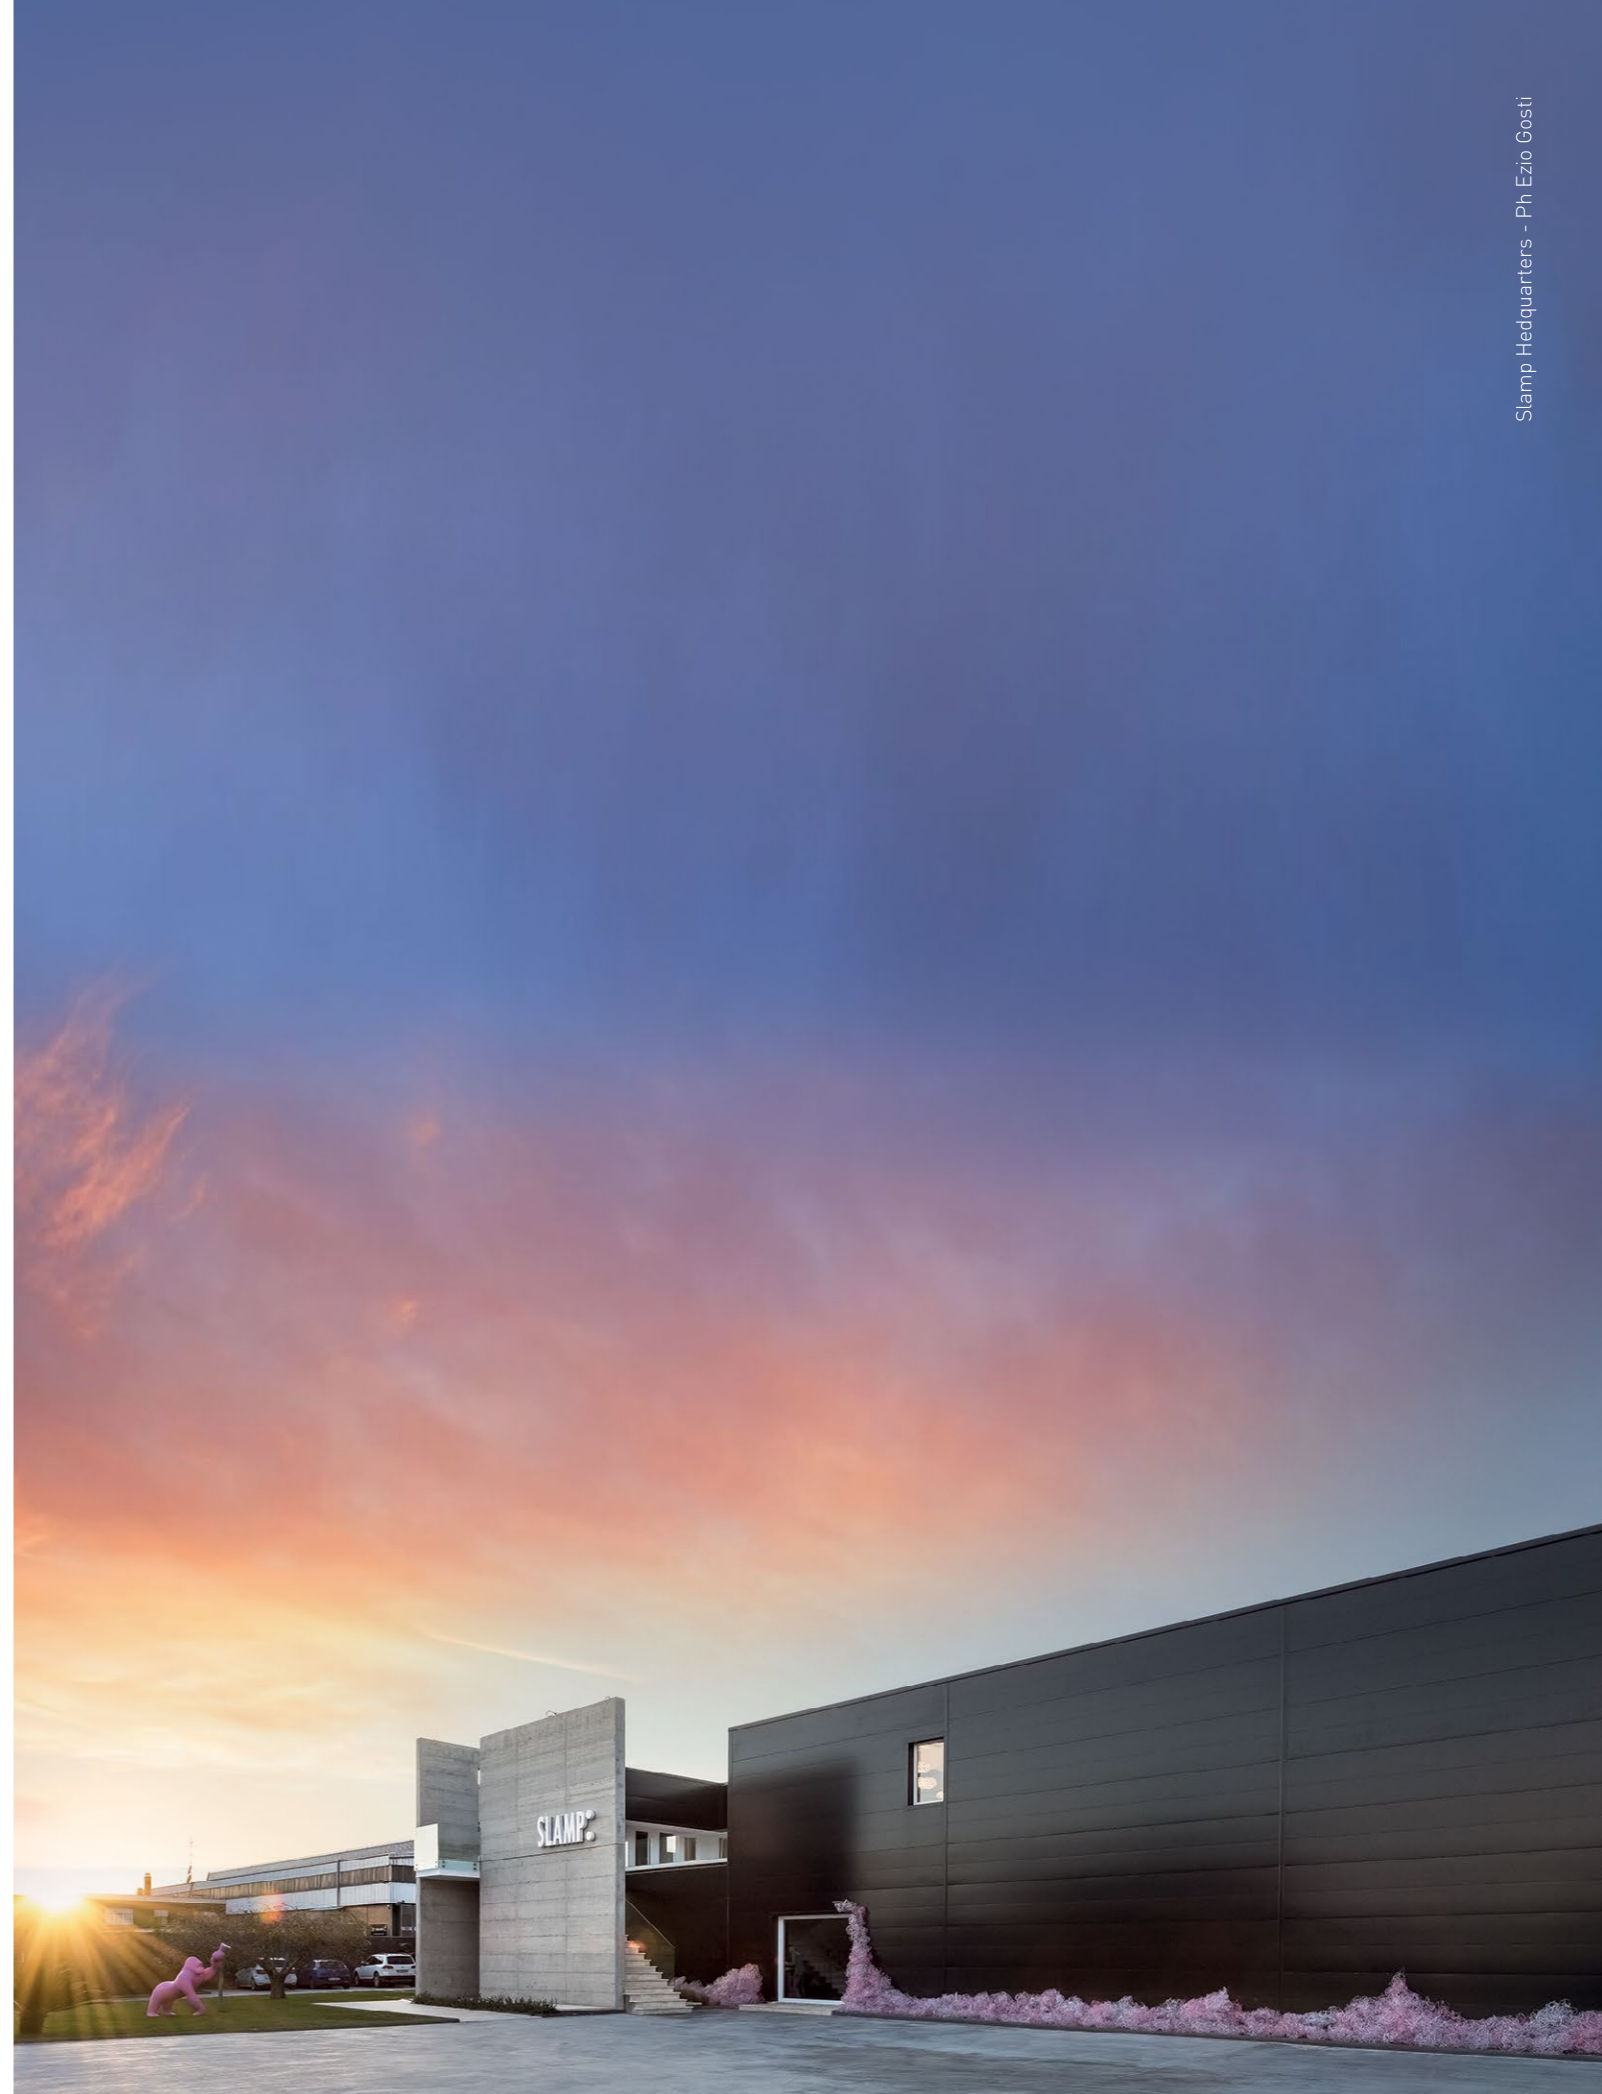

The semantics of lighting culture can be distilled into one essential concept: the curation of tactile aesthetics opens a portal to the unique, intangible dialogue held by illumination and spatial identity. Luminous choices are a calling card, the gateway to an inimitable feeling that lingers long after we've literally stepped away from a place. Piquing the physical senses is simply the beginning of a more internal impact that lighting design holds for an individual, shaping their immediate perception and defining an overall experience that reaches beyond brick and mortar, leaving behind the simplicity of four walls. Slamp has been at it for years, scribbling, illustrating far outside typical design frontiers in order to step over established boundaries that classify light as a peripheral element, an afterthought to other objects. Objects are palpable and

specifically defined only thanks to the true architect of visual and emotional consciousness: illumination. Whether steeped in opulent abundance, an excess of minimalism, linear innovation, or wafting, limitless poetic verse, the following pages trace how Slamp's endless luminous possibilities stand as the genesis of one's surroundings, the precise foundation for what will be conceived, and what is perceived. The company's take on avant-garde, versatile modular options and stand-alone pieces to be combined at will moves from shapeshifting expansive elements that beg for behance installations to stark architectural sculptures that make up the lustrous bones of a place, when singular or elegantly combined. This book is an invitation, a peek into the potential, the aesthetically unbound, the never-imagined power of light.

BEYOND LIGHT

EVERY DAY, WITHIN OUR 8,000 SQ. M ATELIER
JUST OUTSIDE OF ROME, WE BRING LIGHT
BEYOND THE BOUNDARIES OF WHAT HAS ALREADY
BEEN SEEN, BLENDING AESTHETICS AND ETHICS,
CHOOSING UNIQUE MATERIALS AND
SUSTAINABLE TECHNOLOGIES.

HANDCRAFTING

handmade in Italy

SINCE 1994

Slamp has been at the forefront of creating innovative, original, eclectic, and contemporary lamps since 1994, taking current inspiration from the natural world, architectural and sartorial genius, and artistic trends. Slamp creates suggestive, luminous, and versatile objects using the latest generation of materials, manually moulded into elements that combined together, make up a luxurious landscape.

The use of exclusive, lightweight and resistant technopolymers gives a unique and recognizable touch to every lamp, allowing it to be sculpted into three dimensional shapes, decorations and effects that would be impossible using any other material. Much like any maison dedicated to haute couture, Slamp lamps undergo a precise ritual that transforms a sheet of technopolymer material into an exceptionally decorative, three dimensional shape through cold cutting and handcrafting.

Seventy Velvet modules define spaces within a lobby; silky, printed Lentiflex® throws iridescent refractions thanks to the glow of bi-directional spotlights.

DESIGN BY MIGUEL ARRUDA

NUVEM

the essence OF A PLACE'S IDENTITY

Almost weightless and enhancing not only refractions that quietly conceive the essence of a place's identity. Perception shifts, drawing the eye towards behance, uniquely crafted forms there are unlike those seen before: Nuvem is the frontier of illumination, defying gravity and serving as a calling card for any location. Original minimalism, manifold opportunities for making an unforgettable first impression.

Consider Nuvem a luminous introduction, an undeniable presence defining its surroundings with geometric, expansive glow that strikes anyone standing below, or beside. This highly customizable, modular system moves lighting beyond its traditional function, enveloping

Previous page: 3 overlapping bands of Nuvem create a composition of 115 modules.

The meter-long hexagonal elements are easily connected by hand using a series of interlocking tabs that allow for limitless omnidirectional installation. Pictured, a composition of 50 modules.

Nuvem's height can be adjusted using the provided 6 meter cable; once suspended, shape the installation using the push and pull system located directly beneath each module, adding or releasing tension to the lamp's surface. Pictured, a composition of 35 modules.

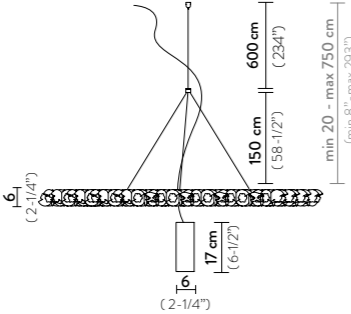

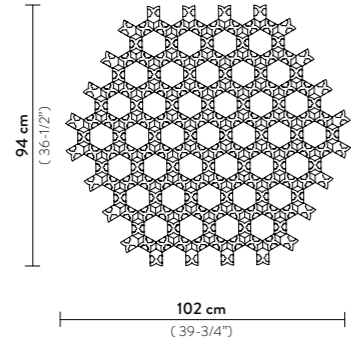

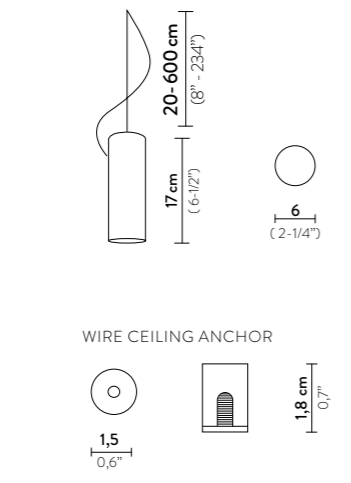

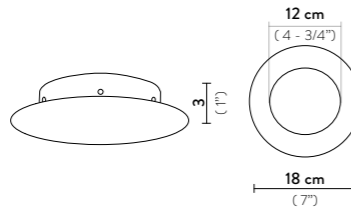

ENDLESS

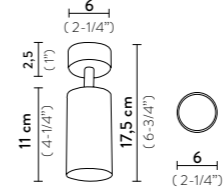

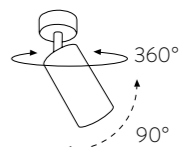

shapeshifting

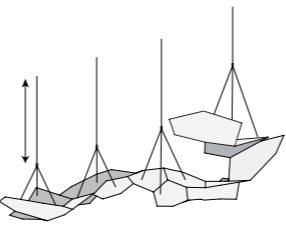

POSSIBILITIES

Nuvem perfectly encapsulates the fundamental role of light within a space, the decisive animation of other decorative aspects. One meter, hexagonal modules entice the imagination with ingenious solutions that disregard conventional lighting installations. Whatever formation piques interest and captures the aesthetic attention of those destined to inhabit the place, even if for a fleeting moment, Nuvem's modules are easily and instinctively connected, hung, and illuminated by bi-directional spots. Not only a luminous ceiling, but true sculpture adapting to vertical or angular surfaces as well, framing an area and serving more as ethereal, floating architecture for interiors of every type, and every size.

Nuvem's lighting system is a series of bidirectional spotlights that can be positioned above or below (threaded through the modules' openings).

ADJUSTABLE HEIGHT

Nuvem's height can be adjusted using the 6 meter cable (234"), and once suspended, the design can be "moulded" using the push and pull system located directly beneath each module. The lamp collapses or tenses when the wires are pushed (released) or pulled, giving the ceiling a fluctuating feeling.

INFINITE EXTENSIONS

The meter-long hexagonal elements are easily connected by hand using a series of interlocking tabs that allow for limitless omnidirectional installation. The modules facilitate the adaptable and mutable personalization of private and contract spaces, adding a strong artistic note to each.

PERSONALIZED SPOTLIGHTS

Nuvem's lighting system is a series of bidirectional spotlights (one per square meter) that can be positioned above or below (threaded through the modules' openings). Additional spotlights can be purchased separately for compositions that require amplified illumination.

VERTICAL DECORATION

Weightless and free...just like a cloud. Nuvem goes beyond traditional illumination, with agile anatomy that allows it to transform the architectural elements of a space, running across the ceiling and moving down the walls, creating an infinite sky.

LA LOLLO

DESIGN BY LORENZA BOZZOLI

La Lollo: weightless transparent and metallized techno-polymer cylinders encircle a LED source. Diameter and number of rings can be personalized.
Pictured: a custom version of Ø160 cm x h. 35 cm. Light details:
180 Watt - 100 - 240 Vac / 24Vdc Lumen 20.636 - 2700 Kelvin - CRI > 90.

OPULENT SUSTAINABILITY

La Lollona and Odeon metallic textures adorn almost weightless yet impactful cylinders that multiply infinitely, allowing the true definition luxury: the uninhibited freedom to customize. Iconic illumination inspired by decades past, refined nostalgia, and a hint of welcome excess shaded with contemporary restraint make for the perfect blend.

snub the concept of moderation, opting for a mindful version of "more is more"...and why not beyond? Undeniable extravagance never rests heavy on the conscious or the environment when exclusive, resistant, and sustainable materials are crafted by beings, not machines, an approach applied to all the brand's luminous creations. Luxurious tones and

Extraordinary view, easy to install. All there is left to do is to connect and hang it, basking in its glow.
Previous page: a custom version of 3 different ring in white finishing Ø156 cm x h. 85 cm

The suspension's colours and size can be customised upon request, fitting for large scale installations.
Picture: a custom version in gold finish Ø115 cm x h. 145 cm.

ALMOST
weightless
ABUNDANCE

The definition of lavish takes on a new volume with La Lollona and Odeon. Rings upon rings of sustainable technopolymers imitate the rippled textures and gilded accents of rich Art Deco glasswork. And yet, the transparent or metallized cylinders are lightweight and unbreakable, perfectly camouflaged as a luxurious fusion of modern sustainability and vintage charm. Every personalized work of art is easily installed regardless of how luxe and exuberant the luminous sculpture. Both the radial structure and geometric shape can be created ad-hoc, multiplying or even shifting form to effortlessly, sensually inhabit spaces.

Next page: Lightweight is luxury! With a 160 cm diameter and 130cm height, the customized La Lollona 6 weighs only 35 kg.

Odeon can be customized for any project,
with a diameter reaching up to 210 cm,
adapting technical aspects to meet
specific requirements.

ODEON

Zaha Hadid and Slamp have collaborated since 2013 to create visionary, fluid and dynamic glowing architecture that brings the architect's revolutionary and iconic semantics to hospitality interiors. Pictured Avia Suspension (white and black fade) and Aria Gold Applique.

ARIA and AVIA

DESIGN BY ZAHA HADID

STRUCTURAL genesis

The very substance of revolutionary genius, an architectural fingerprint that has left its mark throughout the design world: the iconic work of Zaha Hadid, distilled into a luxurious reminder of the DNA that has changed the definition of inhabitation and perception. Aria and Avia's sculptural, almost skeletal elements blend with a sense of ethereal weight and structure, transmitting the same natural, inviting rigidity encompassed in Hadid's exemplary work. Luxurious geometries encircle the voluminous glowing source slightly hidden within, and much like the DNA defining the architect's renowned conception, each segment is uniquely cut and reserves its own refractions and reflective angles, projecting rare motifs on surrounding surfaces.

Aria's dark edges (Ø90 cm) are digitally printed using an in-house technique, tinting with non-toxic, UV-resistant ink. (Greenguard certified in the "Indoor Air Quality" category)

Hadid's masterpieces are available in a total of 18 sizes and 5 finishes, all handcrafted in Stamp's atelier just outside of Rome. Pictured the Avia collection, black and white faded.

From metallized Gold to ethereal transparent, polycarbonate versions, Hadid's masterpieces consist of 50 individual layers that express the renowned Architect's trademark fluid dynamism.

DESIGN BY MARC SADLER

TULIP

This Free Standing Tulip system allows for more aesthetic and technical control than the ceiling rose solutions, including connection to a single electrical source and the creation of a multi-point lighting chain using thinly braided copper wires.

UNENDING poetry

Like a bouquet unleashed and its blossoms strewn into the air, suspended in time and molded within space without descent. Tulip creates serene stillness with a refined, subdued glow emanating from hand-molded blooms gently, almost invisibly connected to one another by curling wisps. Each collection of blossoms brings an almost weightless dialogue, allowing the

atmosphere around them to calmly flow with silent movement, caressing the delicate stems and muted petals as they cast refractions below them. Infinite possibilities and multiple configurations give way to unending imagination for those who create the verses, and those who cohabit with this aerial flora turned poetry.

A free-standing composition of 112 blooms.

A free-standing cascade
of 441 blooms

The LED G4 2900 Kelvin lightbulbs come with the product and can be replaced autonomously, a dual-function commodity that allows for more efficient and rapid maintenance, as well as the personal choice of warmer or cooler lighting.

POIGNANT GRACE

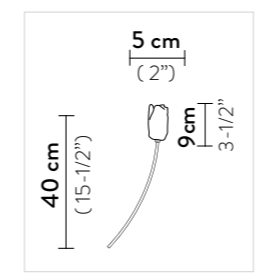

Pinpoints of copper stems and flurries of delicate wisps cast minute reflections, buoyant yet defining the surrounding spaces without dominating them. Every individual bloom shines from within, casting a glow that placidly diffuses amongst the intricately woven threads connecting them. An array of pre-determined configurations allow for endless aesthetic solutions, from cascades to bunches, from a luminous blossoming ceiling to gravity-defying geometries that encompass an area without compromising the feeling of inhabiting within the tangible energy of unburdened places. The definition of a personalized visual dialogue, a bouquet of unmapped blooms can be arranged or scattered for heightened, imaginative expression.

Next page: two compositions of 35 tulips each, arranged horizontally on the table and vertically like a luminous waterfall.

- ### HANGING DETAILS
- ADJUSTABLE STEEL CABLE
 min 20 cm (7-3/4")
 max 300 cm (117") - 600 cm/234" upon request
 - MAIN COPPER ELECTRIC WIRE
 max 300 cm (117")
 - Max distance from one tulip to another (electric copper cable) of 80cm / 31"

DESIGN BY SLAMP CREATIVE TEAM

HUGO

Every Hugo Vertical module has co-axis cables, creating clean lines and simplifying installation. Pictured: a composition of 135 modules.

linear MINIMALISM...

Whether slender rows, luminous columns, or abstract cascades are the best solution to set the mood and define the purpose of a space, Hugo's sober, slim lines are a key player. An underestimated shape envelops liquid illumination that lies at the apex of heightened technology geared towards the wellbeing of those who coexist with it, and aesthetics proving that innovation is certainly worth a second glance. Curated details meet a coveted level of interior lighting specifically designed to go easy on the eyes, scientifically and decoratively speaking. Hugo's modules, easily inter-connected, cast the perfect glow when hung close to surfaces while allowing the unique versatility to carve out spaces with straight lines or unexpected installations.

A customized version of Hugo Vertical, 50 cm above table surfaces.

The Hugo collection enhances the qualities of traditional technical lighting, and is compliant with the main office requirements UNI EN 12464-1:2011.

...innovative MAXIMILISM

Draw within the lines or dare to design outside of them? Hugo knows no bounds. Modules can be interconnected horizontally in multiples to illuminate surfaces below, hung individually anywhere and everywhere at a desired angle, or in audacious arrangements, either contained or infinitely expanding downward and outward. The specifically-designed architectural

system facilitates linear installation, reducing impact to surrounding structures and maximizing range of use tailored to the spaces' specific purpose. Singular models alter the reigning concept of restrained lighting, bringing a rippled, flowing glow that defies gravity with harmonious silhouettes that can be shaped and sculpted into original, extravagant geometric displays.

Next page: an installation of multiple Hugo modules creates a particularly unique, dramatic statement within large public spaces. In this picture, a composition of 80 modules.

HANDMADE IN ITALY

ALL SLAMP PRODUCTS ARE PRODUCED AND ASSEMBLED IN ITALY

Tutte le lampade Slamp sono conformi alla Normativa RAEE
All Slamp lamps are RAEE Standards compliant

The company suggests this lightbulb wattage for an optimal balance of illumination and aesthetic output per product, as well as bulb size: E27: Ø6 cm (2,34") E14: Ø4,5cm. (1,75"). Higher wattage can be used as long as the bulb is exclusively LED and matches the required size.

Il wattaggio delle lampadine sul seguente catalogo è suggerito dall'azienda per un ottimale balance fra resa luminosa ed estetica del prodotto oltre che alla dimensione del bulbo E27: Ø6 cm - E14: Ø4,5cm. Possono essere utilizzati wattaggi superiori purchè si utilizzino esclusivamente lampadine LED con una dimensione del bulbo adeguata.

Products are patented throughout the world and conform to the leading electrical safety standards. For any further info please ask your Slamp representative.
